DESITE BIM

Interactive Information, Quality
and Project Management for
Building Information Modelling

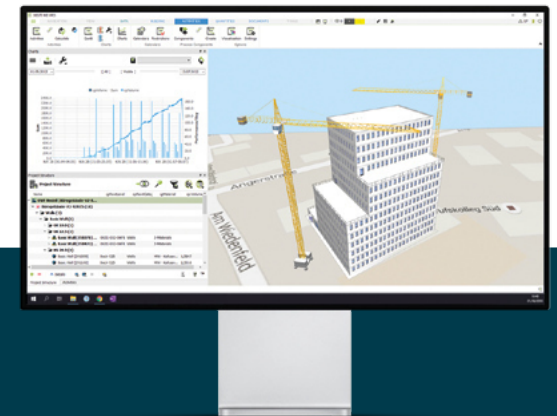

#constructionintelligence

Building Information Modelling (BIM)

is on its way to being established as a best practice work method for AEC. However, the IT ecosystem is very diverse, limiting the use of BIM throughout the entire project. For example, planners use CAD software to create models, while project managers use tools to create schedules or control cost. Integrating all available project information into building information models increases both usability and transparency. By using BIM, projects can run more efficiently, which saves time and money. Having all the information in one place also makes it easily available for future renovations.

DESITE BIM

is the tool that enables the integration of different types of information into building information models, conducts model checking and clash detection, runs 4D simulations, and creates schedules, information take-off, quantity take-off and more. DESITE BIM is increasing the use of BIM within projects thanks to its easy usability.

About DESITE BIM

Different DESITE BIM products to serve all project stakeholders with varying levels of BIM proficiency, thus making BIM achievable

Open and neutral: a variety of data formats are supported to collaborate with all stakeholders throughout the project

Desktop application that channels the computing power of your PC for fast execution and connection to the cloud for collaborative work for distributed teams

As easy as spreadsheets: extract and analyse BIM data using familiar, intuitive formulas

Supports a variety of BIM use cases along the entire BIM value chain in order to drive results

Developed from years of industry know-how and applicable for all types of projects – from building construction to infrastructure

DESITE md/md pro BIM Management and BIM Coordination

DESITE md ("manage data") allows BIM Managers and BIM Coordinators to integrate 3D models and further information provided by other stakeholders into a BIM environment. Project Managers and other stakeholders are enabled to use BIM for 4D simulations, scheduling and controlling, quantity take-offs and more. DESITE md pro is the full scale version, with model checking and clash detection included.

DESITE BIM md

- ✓ More than 25 different import and 10 export formats
- ✓ 4D simulations, scheduling and controlling
- ✓ Model integration and information management
- ✓ Core functionality including navigation, clipping, redlining and forms
- ✓ Quantity take-off
- ✓ Model Server integration

DESITE BIM md pro

- ✓ All features of DESITE md
- ✓ Model checking
- ✓ Clash Detection

DESITE custom 3D model onsite

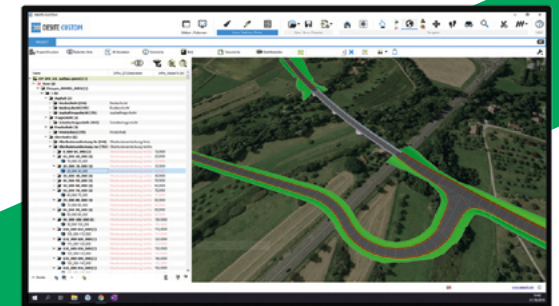

This simplified version of DESITE BIM is perfectly suited for use onsite in the process of coordinating with other project stakeholders.

With its streamlined functionalities, DESITE custom can be easily used in project meetings during the construction process. It can also serve as a tool for site managers who want to check geometry, as well as for other project members who want to work with BIM.

Stakeholders who have not yet had much experience with BIM will find it especially easy to use, as input into models can be introduced via forms – without any CAD or BIM knowledge.

DESITE BIM custom

- ✓ Open coordination models, viewpoints in BCF
- ✓ Core functionalities like navigation, clipping, redlining, selection sets
- ✓ 4D simulations, scheduling and controlling
- ✓ Forms
- ✓ Model Server Integration

DESITE share/share pro 3D viewer

DESITE share is the free BIM Viewer that's provided to enhance the client experience. It's highly intuitive so clients can easily use it without training to view the progress of their BIM project. This tool gives designers and BIM managers an easy option for sharing view models with clients. Upgrading to the licenced DESITE share pro includes additional features, such as model checking capabilities, which is an asset for clients who want to be more hands-on involved in the process.

DESITE BIM share

- ✓ Open DESITE BIM projects, CPIXML and IFC files (only one single project file at once)
- ✓ Import and export of viewpoints as BCF files
- ✓ Core functionality including navigation, clipping, and redlining

DESITE BIM share pro

- ✓ All features of DESITE share
- ✓ Import of all known formats as DESITE md
- ✓ Open more than one project file at once
- ✓ View the project structure, bill of quantities, and 4D simulations
- ✓ Select and filter objects and view their properties

DESITE touch 3D model on your mobile device

DESITE touch is a simplified version of DESITE custom. The streamlined functionality allows for the software to be used on the go, for instance during site inspections.

DESITE BIM touch

- ✓ Application for Windows tablet
- ✓ Navigation with gestures
- ✓ Forms

About us

thinkproject is a global leader in construction intelligence. Our digital technologies unlock the potential of people and information to help construct a better world.

Since 2000, we have helped our customers deliver over 10,000 projects, achieving the fastest payback period in the sector.
